## Sahara - *Perfectly Balanced*

Sahara fits a precise 'niche' in your motor home lifestyle. It's the perfect balance of luxury and value, offering many features only found on coaches costing so much more.

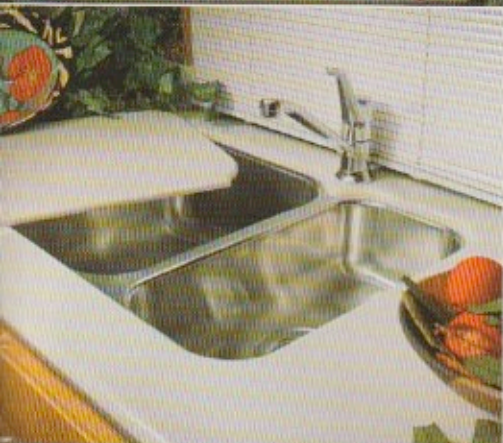

Sahara 2000 doesn't skimp on the things you enjoy most. A full galley-thru-bathroom wood plank floor is standard. Hand finished hardwood cabinets throughout the coach interior provide plenty of storage. Upgradeable features include a Bose® Surround Sound system or Fountainhead™ countertops. Sahara makes choosing your next motor home easy - it's the perfect way to balance your lifestyle, and your budget.

Erosia Decor shown

Sahara's luxurious Alder hardwood cabinetry accents a distinctive wood plank floor in the galley and bath-room area.

### *Thoughtful livability . . .*

Thoughtful design features make Sahara one of the most 'livable' coaches. With the full galley and living area slide-out expanded, you can 'flip up' extra counter space at the end of the cabinet, a nice feature for the chef at mealtime.

Cover the stainless steel sink with a Fountainhead™ insert for even more counter space. Sahara's dinette is crafted from grain-matched alder and is accented with designer fabric covered chairs. Upholstered valances surround the windows and privacy mini blinds are a snap to use and easy to clean.

## *Slide-out living at it's finest.*

Merely press a button and a new vista in living awaits. Sahara's full galley-living area slide-out operation is smooth and quiet, yet adds so much more room to enjoy.

Sahara's slide-out design places the operating parts within the chassis structure. The single piece fiberglass roof is sloped and pitched for proper drainage. Basement storage moves out with the slide. Ease of operation, superior design . . . another Safari innovation.

Color coordinated wrap-around privacy curtains accent the luxurious decor, highlighted with custom designer fabrics and Berber carpet. Sahara can be ordered with UltraLeather™ cab seats and recliner, as shown, and you have a choice of three color decor packages. The sofa converts to a bed for additional sleeping.

Sahara's custom burl-wood dash panel includes a Delco® AM/FM radio with cassette player and an optional VMS 200EL engine performance monitor.

Sahara's inviting bedroom is tastefully crafted with designer touches that blend coordinated fabrics and hardwood cabinetry. Abundant closet space, 110V lighting and a color TV make the Sahara bedroom a perfect retreat.

The Hurricane Hydronic heating system also provides the Sahara with a continuous supply of hot water, all in a single integrated system. Enjoy the coziest nights in the coldest weather and wake refreshed with a shower with abundant hot water for the whole family.

## Chassis Specifications and Features

Sahara's Magnum Blue Max™ chassis features the Caterpillar 3126B electronic turbo diesel engine for plenty of power. It also makes possible many innovative features.

Other features you'll enjoy include the SoftCruise™ cruise control for freeway driving and the scissor-style sun visors. There is dash air conditioning for your driving pleasure as well as a six-way power driver's seat.

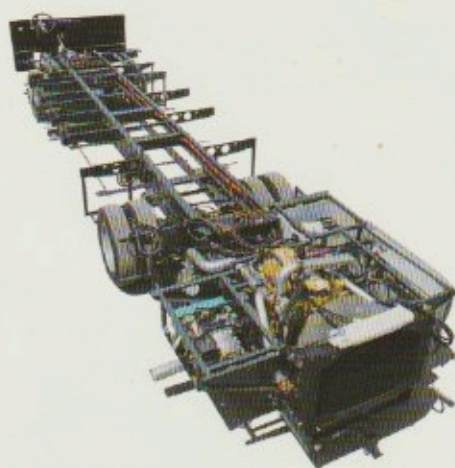

Driving and handling is a breeze with the BFGoodrich Velvet-Ride™ suspension system and four wheel hydraulic anti-lock disc brakes. A PacBrake® engine retarder helps out on the downgrades and the smooth shifting Allison MD3060 World™ transmission makes easy cruising on the rest of the terrain.

When you have reached your destination, the three-point hydraulic leveling system will make your stay as solid as the chassis it's built on.

With a GVWR of 29,000 lbs. and a GCWR of 34,000 lbs., the Sahara can pack plenty of payload.

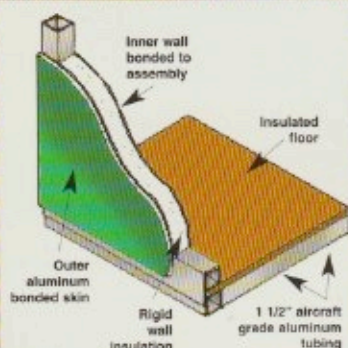

The famous Magnum 'rack and pinion' slide out has proven to be the most durable in the industry, as well as the most waterproof. Special drainage and bubble gaskets virtually eliminate water and wind noise from the living area.

A large and spacious basement area is heated and insulated to keep your cargo dry and safe from the varying effects of different climates. The basement also provides easy access to all of the coach systems. Deeper lift-up doors make access easy to the pull-out battery tray, the plumbing manifold, engine service center and the Onan™ generator.

## Sahara 2000 Specifications

Transmission-	Allison MD3060 World™ Transmission w/ 6 Speeds and 2 Overdrives
GVWR	29,000 lbs.
GCWR	34,000 lbs.

## Single Piece Aluminum Skin

Safari is famous for its aircraft-grade aluminum construction techniques, and the outer skin of each coach is the frosting on the cake, so to speak. This single piece aluminum skin is utilized in a state-of-the-art bonding process that makes leaks virtually impossible. Plus, the lasting durability of aluminum and the beauty of a high gloss automotive grade paint finish will bring years of beauty and trouble-free maintenance.

## Sahara 2000 Features and Options
